التعليم والخدمات التعليمية

Chapter 07:
Education and Education Services

7 - Education and Education Services

The formal education in Bahrain started in 1919 when the first boys' school was opened in Muharraq town . Nearly ten years later (in 1928), the first girls school was opened . In 1929 Education was put under direct Government control represented by Min

Education in Bahrain is composed of three stages: Primary stage (6 years), Intermediate stage (3 years) and Secondary stage (3 years).

() :
() ()

Higher Education is available for graduates of secondary education and can be obtained through two Governmental Universities , Bahrain University and Arabian Gulf University and 12 Private Universities , and specialized institutes such as College of Health Sciences and Gulf Hopitality & Tourism College

In view of the high concern of the government towards human resource development it is appropriate to supplement this section with a part on training.

A quick glance at educational and training data reveals, in general, the extent at which those two important fields have progressed from year to another.

Noticeably, the numbers of students and trainees enrolled in governmental and private schools as well as training centers are increasing. This underscores the high value attached to education and training by both the government and citizens. In this respect, the government spares no effort to establish new schools and training centers, and provide them with highly qualified teachers.
